

## **Poly-Tek FlameWave™ Fence System** **Technical Data Sheet**

### **Material Composition**

Poly-Tek FlameWave™ Fence Panels are a single skin, Non-Combustible, MgO (Magnesium Oxide) board. Each board features a waved profile and is prefinished in an Anti-Graffiti, UV stable 'Woodland Grey' polymer coating.

The fence can be installed in either a post and rail or friendly neighbor system.

### **Wave Profile**

### **Acoustic Attenuation**

**Surface Density 15kgs m<sup>2</sup>**  
TMR Acoustic Specification is  
15 kgs m<sup>2</sup>+

The FlameWave™ Fence System can be used for residential or commercial applications such as;

- Cost effective Developer estate fencing.
